

## Web Technician - Full Time Position

### Web-centric Degree or Equivalent Certification

#### Skills Required

Must have full working knowledge of web technologies, including, but not limited to:

Working knowledge of HTML/CSS/XML  
Experience with PHP/SQL environments  
Familiarity with Adobe Flash, Dreamweaver and Photoshop  
Proficiency in the use of an Apple Mac  
Proficiency in the use of Microsoft Office products  
Experience with Web 2.0 design trends and enabling technologies

Database Technologies  
Intermediate/Advanced working knowledge of relational databases  
Must be able to confidently write SQL queries for a variety of different databases  
Must possess working knowledge of various database access methods

#### Personality

It is important that the candidate have the following:

The ability to work to set deadlines  
Be able to communicate their thoughts effectively  
Must be able to operate in a mixed ability team  
Be familiar with project timelines, and working within a methodology  
Must have an open mind to new technologies and techniques

#### Communication Skills

Working within this environment, the candidate must be able to demonstrate effective communication skills, such as:

Ability to listen to team members (and others) and accept input  
Ability to clearly articulate thoughts and ideas both written and verbal  
Ability to prepare written documentation for both end users and other members of the business in a coherent and professional manner

#### Professional Development

It is important that the candidate strive to better themselves and their abilities with each project, for example:

Be able to demonstrate the understanding of professional development by setting challenging goals, learning new skills in order to respond to working in a changing environment  
Must be willing to seek input and support from managers or peers on areas of difficulty  
Must be able to demonstrate the ability to take feedback received from projects and strive to improve future output and performance.
